December 2008
VOL. 116, NO. 6

On the cover: Some 10 to 20 years hence, NASA may fly a balloon mission to explore Titan’s murky atmosphere and surface.
S&T Illustration

FEATURES

26 Titan: Earth in Deep Freeze
Saturn’s largest moon has remarkably Earth-like mountains, lakes, and dunes — yet their composition couldn’t be more different.
By Jason Barnes

34 Still Debating Pluto’s Fate
In 2006, astronomers thought they’d settled the qualifications for planethood. They couldn’t have been more wrong.
By J. Kelly Beatty

36 Palomar’s Big Eye
Much of 20th-century astronomy was dominated by telescopes that grew from the vision of one man.
By Todd & Robin Mason

74 The Great Total Eclipse of 2009
The century’s longest solar eclipse sweeps across China and the Pacific next July 22nd.
By Fred Espenak & Jay Anderson

96 Data Mining for Astro-Gold
There could be surprising discoveries lurking in your astrophotos.
By Paul Mortfield

S&T TEST REPORT

43 Return of the 5-inch Celestron
Celestron’s venerable 5-inch Schmidt-Cassegrain rides again, with a new mount and livery.
By Adrian R. Ashford

46 QuickLook: iOptron Mini-Tower
By Dennis di Cicco

48 QuickLook: HoTech SCA Laser Collimator
By Sean Walker
